

Introduction

Streamlined choice. Trusted quality. SureSTART vials, caps, inserts, well plates, mats and accessories.

Excellence from start to finish

The Thermo Scientific™ SureSTART™ sample handling collection includes a range of sample storage and analytical vials and well plates previously sold under Thermo Scientific™ National™, Thermo Scientific™ Chromacol™ and Thermo Scientific™ Sun-SRi™ product names.

All these products have been transitioned and absorbed into one collection so we can deliver a first-class product experience to our customers from the moment you start your purchasing journey, to provide you with performance, instrument compatibility, affordability and delivery that you need.

We understand that not every experiment or analyte is the same, and that you need products that can meet your performance and pricing requirements. You can find three different waves on each of our glass vials, making it easier for analysts to select the right products.

With the SureSTART collection, we ensure that no HPLC/UHPLC or GC system gets left behind. Our vials and well plates are suitable for standard instruments from all vendors, streamlining and simplifying your stockroom—and your budget.

Why choose Thermo Scientific SureSTART collection?

Five main benefits to you		More ways to master your testing
	Assured quality and performance	Need standards of quality and performance? Our SureSTART collection has you covered, ensuring you can meet regulatory requirements.
	Instrument compatibility	Our collection contains a broad selection of products to provide complete compatibility for add-on and integrated chromatography autosamplers.
	Sample security and low compound adsorption	Protect your samples from being affected by pH shifting, adducting or contamination, and prevent analyte loss from either the cap top or analyte adsorption to the glass surface.
	Better product experience	Our SureSTART collection is segmented into three different Performance levels, with visual waves on each glass vial to ensure you always select the right product for your experiment, every time. <div style="display: flex; justify-content: space-around; margin-top: 10px;">    </div>
	Power to extend your consumables budget	We offer several ways to realize extra value and extend your budget, including built-in bulk discounts—the more you buy, the more you save. <div style="display: flex; justify-content: space-around; margin-top: 10px;">    </div>

SureSTART Performance levels

Greater choice for what matters most

We are committed to providing a broad selection of solutions for all your chromatography and sample storage requirements.

Our vials and autosampler well plates are consistently manufactured with the lowest levels of extractables and leachables. They are also made from glass that has the lowest compound adsorption, and plastic that is tested and approved for analytical use.

We have high level of standards and certification available in the marketplace so that you can obtain highly reproducible data.

Whether you have routine samples, or you need to ensure high level of confidence and compliance, our market-leading collection of storage and autosampler vials, well plates and sample handling accessories has everything you will need

One collection. Three performance levels. All from one trusted source.

to learn how two products can support you with improving your results.

Analytical performance requirements

Products	Detector type	Description
 Thermo Scientific™ SureSTART™ Performance level 1 products	Non-MS	Suitable for QA/QC applications using core detectors, e.g., UV/Vis, PDA, RI, ELSD, FLD, FID, NPD, ECD, TCD, or FPD. Compound concentrations are at easily detectable levels.
 Thermo Scientific™ SureSTART™ Performance level 2 products	MS	Suitable for routine QA/QC applications using MS technology. Compound concentrations are at easily detectable or low levels of detection.
 Thermo Scientific™ SureSTART™ Performance level 3 products	MS	Suitable for challenging applications, and research-focused applications, using MS technology. Compound concentrations are at/near the method detection limit.

Performance level 1
Everyday analysis:
Chromatography approved

Performance level 2
High throughput:
Robust and reproducible

Performance level 3
High performance:
Selective and sensitive

Selection guide for vials and well plates

Which SureSTART product/Performance level is right for you?

There are several factors to consider when choosing a vial or well plate for your application. This section will help guide you through this process to determine which combination is most suitable for your application requirements

Need a quick answer?

Why not use our online product selector guide that includes our entire SureSTART collection of vials, caps, well plates and mats.

Already purchasing a product?

Let our selection guide tool find the equivalent SureSTART product/catalog number for you.

The screenshot shows the ThermoFisher Scientific website's SureSTART Selection Guide. At the top is a navigation bar with the ThermoFisher logo, a search bar, and links for Order Status, Quick Order, and Sign in. The main heading is "SureSTART™ Selection Guide" with the subtext "Selecting your vial and well plate has never been easier." To the right is an illustration of laboratory equipment. Below the heading is a progress indicator with two steps: "1 Selection guide" (active) and "2 Find your vial". Under "Find your vial", there are three main options:

- Find your SureSTART solution:** Find the perfect sample handling solution for your application in only a few clicks.
- Search by application:** Search for the best SureSTART solution for your application.
- Search by equivalence or compatibility:** Search for an equivalent or better performance product to other vendors or older ThermoFisher Scientific brands. Also search for compatible vials, caps, plates and mats to ThermoFisher Scientific products.

A red circle and a white arrow with a red dot point to the "Find your SureSTART solution" option.

Choosing your vials and inserts

The chart below provides a quick guide to selecting the right vial/insert and material for your experimental and application requirements

Performance			Sample volume		
Non-MS Compound levels not challenging	MS Compound levels at relatively low levels	MS Compound levels near method detection limit or for research analysis	Not sample limited	Volumes vary	Limited
↓	↓	↓	↓	↓	↓
SureSTART Performance level 1 General purpose: chromatography approved	SureSTART Performance level 2 high-throughput: for applications requiring robust and reproducible results High-throughput: for applications requiring robust and reproducible results	SureSTART Performance level 3 High performance: for applications requiring high selectivity and sensitivity	2 mL vial SureSTART Performance level 1, 2 and 3	High recovery vial Total recovery vial SureSTART Performance level 3	Polyspring insert (self-aligning) Pulled insert (economical choice) Fused insert vial 2 mL vial with separate inserts SureSTART Performance level 2 and 3

Compound polarity			Compound volatility		Compound stability	
Non-polar Mid-polar	Polar	Highly polar	Volatile	Non-volatile	Light-stable	Light-sensitive
↓	↓	↓	↓	↓	↓	↓
Glass vials SureSTART Performance level 1, 2 and 3	*GOLD-grade glass SureSTART Performance level 3	*Silanized glass vials **Polypropylene (PP) vials GOLD-grade glass vials and inserts When low levels of inorganic are required and for solvent stability SureSTART Performance level 1 (PP), 2 and 3 (silanized)	Crimp top vial *Thermo Scientific™ SureStop™ vial Screw thread vial Headspace vials	Screw thread vial Snap-It vial Crimp top vial	Clear vials	Amber vials

*These products can be found in SureSTART Performance level 3

**Not recommended for GC applications

Choosing your septa

The chart below provides a quick guide to selecting the right septa material type for your experimental and application requirements.

Multiple injection?	Temperature?			Thin, fragile needle?	Blunt, thick needle?	Critical analysis?	Low coring?
Good resealability required	-40 °C to 120 °C	-40 °C to 110 °C	-60 °C to 200 °C	Soft and thin septa required	Pre-slit/pre-cut liner as penetration aid (HPLC)	Very clean liner required/ low-extractables	Double-sided PTFE laminated liners required
							
Silicone/PTFE Natural rubber/ TEF	Natural rubber/ TEF Butyl/PTFE	RedRubber/ PTFE	Silicone/PTFE	Silicone/PTFE	Silicone/PTFE, pre-slit septa	Silicone/PTFE	PTFE/silicone/ PTFE

Choosing your well plates and mats

Selecting the perfect Thermo Scientific™ WebSeal™ well plates and mats for your chromatography requirements is easy using our selector tools and resources.

Performance requirements			Compound polarity		Sample availability		
Compound levels not challenging	Compound levels not challenging/relatively low levels	Compound levels at/near method detection limit	Water and polar	Hydrophobic (e.g., proteins and peptides)	Unlimited	Limited	Very limited
↓	↓	↓	↓	↓	↓	↓	↓
WebSeal Plastic, chromatography tested	WebSeal certified products Plastic, MS tested	WebSeal Plate+ Glass-coated plates Plate with glass inserts	WebSeal plastic and certified	WebSeal Plate+ Glass-coated plates Plate with glass inserts	Flat bottom Where sample volume is high	U-Bottom Where sample volume is low	V-Bottom Where sample volume is very low

Microtitre: 14-16 mm (also referred to as microwell and standard well plate)
Mid well plate: 20-41 mm
Deep well plate: >44 mm

Autosampler compatibility					
Agilent	CTC (PAL)	Thermo Scientific™ TriPlus™ RSH*	Shimadzu	Thermo Scientific™ Vanquish™**	Waters ACQUITY
↓	↓	↓	↓	↓	↓
Microtitre plate Mid well plate Deep well plate					Mid well plate

*TriPlus RSH with 6-drawer stack can accommodate 24 microtitre 15.5 mm plates microtitre well plate

**Barcoded plates for complete orientation

Examples of microtitre, mid well and deep well plates shown above

Learn more about the well plate terms:

- Microtitre (also known as microwell and standard well plate): 14–16 mm
- Mid well plate: 20–41 mm
- Deep well plate: >44 mm

Certified integrity and consistency

With over 40 years of experience supplying vial and well plates, Thermo Scientific SureSTART certified products are supplied to meet 'critical to quality' specifications, consistently. SureSTART products are produced in compliance with ISO 9001 requirements.

In addition, SureSTART certified products include:

- Glass vials made from First Hydrolytic Type 1 A borosilicate glass, which conforms to U.S Food and Drug Administration (FDA), USP and EU Pharmacopeia standards
- Chemically and thermally resistant well plates are made of high quality materials
- Our autosampler WebSeal wellplates all conform to ANSI SLAS 4-2004 standards
- In-line opto-electronic testing inspects 100% of all key dimensions

- Our well plates are chromatography tested for solvent compatibility and inertness to ensure your data quality is not compromised
- Packaged in material that has been tested and selected for cleanliness
- Subjected to rigorous end-of-line sampling and quality control procedures to ensure all vials remain within specification
- Most glass vials come with a non-removable write-on patch convenience and ease-of-use
- Patented products, such as Advanced Vial Closure System (Thermo Scientific™ AVCS™) caps designed to minimize sample evaporation
- Products produced and/or packed in a clean environment to reduce contamination
- Glass vials which are available deactivated/silanized

AVCS caps and SureStop vials

The next-generation of sample handling

The patented Thermo Scientific™ SureStop™ and AVCS technology is designed to remove subjectivity around achieving the optimal closure compression when closing a vial. As an integral component of AVCS technology, SureStop vials offer the sealing and performance characteristics of a crimp top vial and the versatility and convenience of a screw thread vial. This is achieved by incorporating a definite stop point into the design of the vial finish, preventing over tightening of the closure.

Compatible with all LC and GC autosamplers, our SureStop vials with our AVCS caps:

- Effectively closures every time
- Obtain cleaner spectra
- More consistent data for GC and LC applications
- Reduce instrument downtime and ensure sample throughput
- Standardize your stockroom

Examples of vial and closure misalignment/deformation.

- (A) SureStop vial self-aligning cap;
- (B) generic vial, cap tilt;
- (C) generic vial, septum dislodged;
- (D) generic vial, deformed top.

Cap tilt and septum displacement due to over tightening

SureStop provides optimal cap positioning

Performance level 1: Everyday analysis

Chromatography approved

Meet your chromatographic needs

Choose the right vial for chromatographic analyses. Thermo Scientific SureSTART Performance level 1 products are designed for everyday chromatography analysis. They provide an affordable choice for use with all GC and HPLC/UHPLC instrument types.

If you are verifying compound presence and quantification using detection techniques such as UV/Vis, PDA, RI, ELSD, FLD, FID, NPD, ECD, TCD, or FPD, our Performance level 1 products are the perfect solution for you—select the products with the one wave.

Within Performance level 1 you will find a selection of vials (glass, plastic, <2 mL, 2 mL and headspace) and specification certified convenience kits.

You can also find a great selection of standard and bonded caps to support robotic autosamplers within this Performance level.

Need stoppers? These can also be found within this Performance level.

Vials	Caps
<2 mL PP screw microvials	9 mm screw caps
2 mL glass screw vials	
2 mL glass crimp vials	11 mm crimp caps
<2 mL PP snap microvials	11 mm snap caps
Plastic inserts	—
20 mL glass crimp headspace vials	20 mm crimp caps
20 mm stopper	—
Specification certified kits	—
Storage	—

Performance level 1 for everyday analyses

- Packaged in material that has been tested and selected for cleanliness
- All products within this performance level are suitable for use with GC and HPLC/UHPLC
- Headspace vials and caps available in 20 mL options
- Vials are identified by one wave and a convenient write-on patch as standard
- Vials and caps available as screw, snap and crimp
- Vials available as clear or amber glass and as either glass or plastic
- Vial volume sizes ranging from 0.3 mL to 20 mL covering limited sample volumes to headspace analyses
- Caps come in a choice of PP, aluminum and magnetic steel caps with silicone/PTFE, rubber/TEF, or butyl/PTFE septa
- Use Thermo Scientific™ manual or electronic crimpers and decrimpers for easy application and removal of crimp caps
- Buy vials and caps in bulk for greater savings

Specification certified

- All SureSTART vials are dimensionally verified to ensure autosampler compatibility
- Automated optical and gauge inspection to ensure critical dimensions and tolerances
- Vials meet all relevant requirements of US, EU, JPN Pharmacopia
- Uniform and defect-free

Lot traceable

- 100% traceable through the manufacturing process
- Certificate of conformance (CoC) available by lot number upon request

Screw vials and associated caps

(<2 mL – 2 mL vials, 9 mm caps)

<2 mL polypropylene screw microvials

Performance level 1 for everyday analysis

Description

- Short thread screw
- 12 mm x 32 mm (diameter x height)
- No marking spot
- Specification certified

For use with 9 mm screw caps, or 9 mm AVCS screw caps

Performance level 2: High-throughput analysis

When robustness and reproducibility are key

Be compliant-ready for your high-throughput samples in regulated environments

Choose Thermo Scientific SureSTART Performance level 2 products to ensure high quality data with an uninterrupted workflow in high throughput applications using GC, HPLC/UHPLC, single or triple quadrupole MS systems. Use these Performance level 2 vials for routine QA/QC applications, where the analyte levels are achievable or close to the method detection level. These products have very low metal content and extractables and leachables and conform to high standards so that you can meet your regulatory requirements. They are specification certified to ensure their physical dimensions and autosampler compatibility.

If you need products that support routine analyses, our Performance level 2 products are here for you. Select the products with the two waves.

Within Performance level 2 you will find a selection of kits (including our range of U.S. Environmental Protection Agency (EPA) and Scintillation), vials, caps, inserts, septa and stoppers.

Performance level 2 for high-throughput applications

- All products within this Performance level are suitable for GC, HPLC/UHPLC, and mass spectrometry (MS) applications
- Volume sizes ranging from 0.3 mL to 20 mL covering limited sample volumes to headspace analyses
- Headspace vials and caps available from 10 mL – 20 mL
- Vials are identified by two waves and a convenient write-on patch as standard
- Vials available as screw, snap and crimp
- Vials available in glass, silanized glass and plastic
- Vials available as clear or amber glass
- Caps available as screw, screw AVCS, snap and crimp
- Use Thermo Scientific manual or electronic crimpers and decrimpers for easy application and removal of crimp caps
- EPA, scintillation and specification certified kits can be found within Performance level 2
- Buy vials and caps in bulk for greater savings

Specification certified

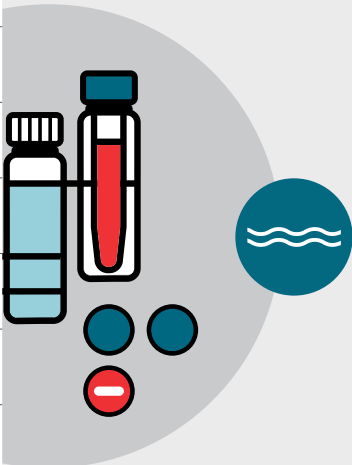

- All Thermo Scientific SureSTART vials are dimensionally verified to ensure autosampler compatibility
- Inspected by automated optical and gauge inspection to ensure critical dimensions and tolerances
- Vials meet all requirements of US, EU, JPN Pharmacopia
- Uniform and defect-free

Lot traceable

- 100% traceable through the manufacturing process
- Certificate of Conformance available by lot number upon request

Performance level 2: High-throughput analysis

Vials	Caps
0.7 mL glass crimp vials	8 mm crimp caps
1.7 mL high-recovery glass screw vials	9 mm screw caps

Screw vials and associated caps

(<2 mL – 2 mL vials, 8 mm caps)

0.7 mL glass crimp microvials for <2 mL samples

Performance level 2 for high-throughput applications

Description

- Crimp
- Conical base
- Specification certified

For use with 8 mm crimp caps

Vial color and material	Amber glass
Total volume	0.7 mL
Usable volume	0.6 mL
Residual volume	2 µL
Ordering information	Cat. no.
100/pack 	6ACV8-07C2

Screw vials and associated caps (continued)

(<2 mL – 2 mL vials, 9 mm caps)

1.7 mL high-recovery glass screw microvials for <2 mL samples

Performance level 2 for high-throughput applications

Description

- Short thread screw
- 12 mm x 32 mm (diameter x height) inner V-bottom base
- Marking spot
- Specification certified

For use with 9 mm screw caps, or 9 mm AVCS screw caps

Vial color and material	Clear glass
Total volume	1.7 mL
Usable volume	1.3 mL
Residual volume	4 µL
Ordering information	Cat. no.
100/pack 	6ASV9-V1
10 x 100/pack 	6ASV9-V1T

Screw vials and associated caps (continued)

(<2 mL – 2 mL vials, 9 mm caps)

2 mL glass screw vials

Performance level 2 for high-throughput applications

Description

- Short thread screw
- 12 mm x 32 mm (diameter x height) flat bottom base
- Marking spot
- Specification certified

For use with 9 mm screw caps, or 9 mm AVCS screw caps

Vial color and material	Clear glass	Amber glass	Amber glass, silanized
Total volume	2.0 mL	2.0 mL	2.0 mL
Usable volume	1.5 mL	1.5 mL	1.5 mL
Residual volume	170 µL	170 µL	170 µL
Ordering information	Cat. no.	Cat. no.	Cat. no.
100/pack 	6ASV9-1P	6ASV9-2P	6ASV9-S2P
10 x 100/pack 	6ASV9-1PT	6ASV9-2PT	—
50 x 100/pack 	6ASV9-1PF	6ASV9-2PF	—

Need a smaller volume?

Try our Polyspring glass inserts for small volume samples

Screw vials and associated caps (continued)

(<2 mL – 2 mL vials, 9 mm caps)

9 mm AVCS screw caps

Performance level 2 for high-throughput applications

Description

- Short thread screw
- 9 mm
- Specification certified
- AVCS screw top technology

For use with <2 mL and 2 mL screw vials

Key attributes	Suitable for PFAS analysis	Bonded	Bonded	Close top cap

EPA vials and caps

8 mL EPA screw vials

Performance level 2 for high-throughput applications

Description

- Screw (15-425)
- 17 × 60 mm (diameter × height) flat base
- Specification certified - Level 100 EPA vials

For use with 15 mm screw caps

These are processed and packaged under a strict registered ISO Quality Management System. The products are not certified to EPA standards or pre-cleaned. Every case of product is labeled with its production number and is custody sealed to ensure reliable chain-of-custody.

EPA screw vials convenience kits are recommended for discrete water sampling under [EPA 40 CFR 136](#) "Guidelines for Establishing Test Procedures for the Analysis of Pollutants" and [EPA 40 CFR 141](#) "National Interim Primary Drinking Water Regulations: Control of Trihalomethanes in Drinking Water"

EPA vials and caps (continued)

40 mL EPA screw vials

Performance level 2 for high-throughput applications

Description

- Screw thread 24 mm (24-400)
- 28 × 95 mm (diameter × height) flat base
- Specification certified - Level 100 EPA vials

For use with 24 mm crimp caps

These are processed and packages under a strict registered ISO Quality Management System. The products are not certified to EPA standards or pre-cleaned.

Every case of product is labeled with its production number and is custody sealed to ensure reliable chain-of-custody.

EPA screw vials convenience kits are recommended for discrete water sampling under EPA 40 CFR 136 "Guidelines for Establishing Test Procedures for the Analysis of Pollutants" and EPA 40 CFR 141 "National Interim Primary Drinking Water Regulations: Control of Trihalomethanes in Drinking Water".

Vial color and material	Clear glass	Amber glass
Total volume	40 mL	40 mL
Usable volume	38 mL	38 mL
Residual volume	0.8 mL	0.8 mL
Ordering information	Cat. no.	Cat. no.
100/pack 	6ASV40EPA-1	6ASV40EPA-2

EPA vials and caps (continued)

15 mm screw caps

Performance level 2 for high-throughput applications

Description

- Short thread screw closure 15 mm (15-425)
- Specification certified

For use with 8 and 12 mL screw vials (and other vials with screw 15 mm dimensions)

Cap color and material	White PP, close top
Septum color and material	PE foam/PTFE
Septum thickness	—
Septum hardness	75° shore
Ordering information	Cat. no.
100/pack 	6ASC15-CTP

EPA vials and caps (continued)

18 mm screw caps

Performance level 2 for high-throughput applications

Description

- Screw closure 18 mm (18-400)
- Specificaiton certified

For use with 20 mL EPA screw vials (and other vials with screw 18 mm dimensions) except for 20 mL headspace vials

Cap color and material	White PP, close top
Septum color and material	PE foam/PTFE
Septum thickness	—
Septum hardness	75° shore
Ordering information	Cat. no.
100/pack 	6ASC18-CTP

EPA vials and caps (continued)

24 mm screw caps

Performance level 2 for high-throughput applications

Description

- Screw closure 24 mm (24-400)
- Specification certified

For use with 40 mL screw vials (and other vials with screw 24 mm dimensions)

Cap color and material	White PP, close top
Septum color and material	PE foam/PTFE
Septum thickness	–
Septum hardness	75° shore
Ordering information	Cat. no.
100/pack 	6ASC24-CTP

Stoppers and septa

Septa for EPA/storage vials

Performance level 2 for high-throughput applications

Description

- Specification certified

For use with screw vials with 20-400 or 24-400 screw thread closure

Product description	Septum (19.5 mm)	Septum (22 mm)
Color and material	Cream silicone/beige PTFE	Clear silicone/beige PTFE
Septum thickness	1.5 mm	2.6 mm
Septum hardness	50° shore	50° shore

Performance level 3: High performance

When sensitivity is a must

Protect your most valuable samples and deliver consistent, reproducible results for your most demanding analyses

Our Thermo Scientific™ SureSTART™ Performance level 3 products are packed in clean rooms to protect them against environmental factors, and contain the lowest amounts/levels of metals, extractables and leachables; ensuring that you can get the sensitivity and selectivity from your most challenging analytes confidently and consistently.

If you need highest performance from your methods, while maintaining high levels of and sample security and integrity, our Performance level 3 products will meet your needs. Select the products with the three waves.

For analytes that are prone to glass adsorption why not try our GOLD-grade glass technology which has been specifically designed for these more challenging polar analytes, as well as our silanized vials and inserts

This offering includes Thermo Scientific™ SureStop™ vials, which, when used with 9 mm AVCS caps, ensure an optimal seal every time. The SureStop vial-AVCS cap system is specially designed to prevent screw thread vial failures such as cap tilt, cap deformities, dislodged septa or septa push through, thus prevents injection failures and sample evaporation.

Our Performance level 3 septa have high purity as they have been conditioned to remove all the low-mid boiling volatiles providing the lowest extractables and leachables within the collection. You can also find within this Performance level soft septa options for ultimate needle performance, as these products offer protection for even the most fragile needles with high gauge, and SPME fibers. You can also find our high temperature compatible septa here.

Performance level 3 for high performance applications

- All products within this Performance level are suitable for GC, HPLC/UHPLC, and nominal mass and high-resolution accurate mass (HR-AM) applications
- Headspace vials and caps available from 6 mL – 20 mL
- Vials are identified by three waves and a convenient write-on patch as standard
- Vials available as screw, SureStop, snap and crimp
- Vials available in glass, GOLD-grade glass, silanized and TPX
- Vials available as clear or amber glass
- Volume sizes ranging from 0.2 mL to 20 mL covering limited sample volumes to headspace analyses
- Vials with fixed inserts are available
- Caps available as screw, screw AVCS, snap and crimp
- Use Thermo Scientific Manual or Electronic Crimpers and decrimpers for easy application and removal of crimp caps
- LC/GC Certified, MSCERT and MSCERT+ Kits can be found within Performance level 3
- Buy vials and caps in bulk for greater savings

Specification certified

- All Thermo Scientific SureSTART vials are dimensionally verified
- Inspected by automated optical and gauge inspection to ensure critical dimensions and tolerances
- Meet all relevant requirements of US, EU, JPN Pharmacopeia
- Uniform and defect-free

Lot traceable

- 100% traceable through the manufacturing process
- Certificate of Conformance available by lot number upon request

What is TPX?

It is a transparent plastic (polymethylpentene) that is heat resistant and has excellent resealability.

0.2 mL TPX screw microvial with glass insert

Performance level 3 for high performance analysis

Description

- Short thread screw
- 12 mm x 32 mm (diameter x height) fixed conical glass insert
- No marking spot
- Specification certified

For use with 9 mm screw caps, or 9 mm AVCS screw cap

Vial color and material	TPX™ with fixed insert
	Clear glass, amber transparent plastic
Total volume	200 µL
Usable volume	150 µL
Residual volume	1 µL
Ordering information	Cat. no.
100/pack 	60180-1655

Crimp vials and associated caps (continued)

(<2 mL – 2 mL, 11 mm caps)

2 mL GOLD-grade crimp vials

Performance level 3 for high performance analysis

Description

- Crimp
- 12 mm x 32 mm (diameter x height)
- Marking spot
- Specification certified

For use with 11 mm crimp caps

Vial color and material	GOLD-grade glass
	Clear glass
Total volume	2 mL
Usable volume	1.5 mL
Ordering information	Cat. no.
100/pack 	6PCV11G

Need a smaller volume?

Why not use with our glass inserts

Crimp vials and associated caps (continued)

(<2 mL – 2 mL, 11 mm caps)

2 mL glass crimp vials

Performance level 3 for high performance analysis

Description

- Crimp
- 12 mm x 32 mm (diameter x height)
- Marking spot
- Specification certified

For use with 11 mm crimp caps

Vial color and material	Clear glass
Total volume	2 mL
Usable volume	1.5 mL

Manual and electronic crimpers and decrimpers

Specification certified, LC/GC certified, MSCERT and MSCERT+ kits

1. Specification certified kits

For everyday analysis

- Tested and certified for up to 15 critical physical specifications

2. LC/GC certified kits

For chromatographic analysis

- Tested and certified for up to 15 critical physical specifications
- Tested and certified using LC-UV and GC-FID to ensure that there are no residual manufacturing agents present in the vial
- A certificate is provided with each kit

3. MSCERT and MSCERT+ kits

For use with mass spectrometry systems

- Our mass spec certified vials carry our highest level of certification and are recommended for low adsorption
- Tested and certified for up to 15 critical physical specifications
- Tested using LC-MS and GC-MS for low contamination
- Certification comes with the kit
- MSCERT+ kits are pre-cleaned and certified for particle count
 - Highly recommended for direct injection analysis (DIA)

	MSCERT	MSCERT+
Proprietary cleaning process to reduce particulates	–	+
Packaged in cleanroom conditions	–	+
Cleanest product available on the market	–	+
Vial/closure combination tested by GC/MS and LC/MS	+	+
Batch specific test certificate with MS-chromatograms	+	+
Closures contain very soft ultra-low bleed silicone septa with PTFE layer or bonded caps	+	+
Optimised for trace analysis	+	+

Specification certified, LC/GC certified, MSCERT and MSCERT+ kits (continued)

Specification certified screw vial and cap kits

Performance level 3 for high performance analysis

Description

- Short thread screw kit
- 12 mm × 32 mm (diameter × height) fixed conical glass insert
- No marking
- Specification certified

For use with short thread screw cap closure

Key attributes	Bonded caps
	TPX vials
	0.2 mL with fixed glass insert
Vial color and material	Amber TPX
Vial total volume	200 µL
Vial usable volume	150 µL
Vial residual volume	1 µL
Cap color and material	Black screw cap
Septa color and material	White silicone/red PTFE
Septa thickness	1 mm
Ordering information	Cat. no.
100/pack 	6PK1655*
Kit vial	60180-1655
Kit closure	6PSC9STB1

*Recommended for Thermo Scientific™ Vanquish™ Neo Systems

EPA certified assembled kits: 40 mL with 24 mm caps

Performance level 3 for high performance analysis

Description

- Screw thread 24 mm (24-400)
- 28 mm × 95 mm (diameter × height) flat bottom base
- Processed and packaged under a registered ISO Quality Management System
- Laboratory certified to meet U.S. EPA Super Fund Standards in accordance with the latest edition of EPA's "Specifications and Guidance for Contaminant Free Sample Containers"
- Every case contains a Certificate of Analysis and is custody sealed to ensure reliable chain-of-custody

Vial description	40 mL (24 mm) screw glass vial
Vial color and material	Clear
Cap description	Bonded white screw cap (24-400) (PP), open top
Septum color and material	White silicone/clear PTFE
Septum thickness	3 mm
Septum hardness	50° shore
Ordering information	Cat. no.
72/pack 	6ACK40COTAS

TOC certified screw vial and cap kits

Performance level 3 for high performance analysis

Description

- TOC certification (20 ppb)
- TOC certification (10 ppb)

Our low-level certified vials for Total Organic Carbon testing and sampling are manufactured, tested and packaged by exacting standards. Thermo Scientific™ TOC Certified Containers are certified to contribute <10ppb or < 20ppb TOC as background.

SureSTART vials and caps accessories

Manual crimpers and decrimpers

Manual crimpers and decrimpers

Achieve secure, repeatable crimps or remove seals with minimized risk of damage

Use Thermo Scientific™ SureSTART™ vial crimpers and decrimpers to manually attach or remove crimp caps from vials, respectively. These manual crimpers and decrimpers are available in 8 mm, 11 mm, 13 mm, and 20 mm sizes and allow you to easily seal or remove crimp caps reliably.*

*These crimper are not for flip top/flip off closures. Further specials are available on request or see our selection of electronic crimper on the following page.

Electronic crimpers and decrimping tools

Electronic crimpers and decrimpers

Our electronic Thermo Scientific crimper portfolio includes tools for 8 mm, 11 mm, 13 mm, and 20 mm crimp caps.

The tools provide all important settings like actual crimp power at one glance. The hand-held crimpers and decrimpers allow crimping of vials with aluminum, pressure release and bi-metal caps while remaining in most sample trays.

The crimp head selection includes also special crimp heads for 13 mm and 20 mm flip-off caps, further specials are available on request.

Attach or remove crimp vial seals with high sample security with a simple, one-handed push of a button.

Electronic hand-held crimpers and decrimpers

The battery charge icon on the color screen of the hand-held tools changes to red when battery is low. Each hand-held tool comes with fully rechargeable lithium ion battery and universal power supply/recharger and international plug adapters.

For steel caps and/or high numbers of crimp or decrimp processes per day we recommend the Thermo Scientific™ High-Power Crimp Station as it provides high crimping force independent from any battery charge status.

Versatile and programmable crimp station

Electronic crimpers and decrimpers features and benefits

- Tools available for use with 8 mm, 11 mm, 13 mm, and 20 mm crimp vial caps
- Available as handheld and high-power models
- These electronic vial crimpers also feature adjustable settings for best crimp results and a motor with extended lifetime and no particle emission
- Interchangeable crimper and decrimper jaw sets for Programmable Electronic High-Power Crimp Stations
- One hand operation with a simple push of a button
- Error message feedback after the incorrect crimping process
- Adjustable settings for best crimp results
- Actual crimp power setting displayed on the color screen.
- 8 different languages available—EN, CN, JA, DE, FR, ES, IT, KO
- Motor with extended lifetime and no particle emission
- Free hands for faster crimping operations with the adjustable Thermo Scientific™ Accessory Base for Programmable Electronic High-Power Crimp Stations. (ECRH-STAND)
- Each High-Power Crimper comes with 12-volt DC supply with power cord
- Crimp and Decrimp Heads for the High-Power Crimper are included in the kits or available separately

WebSeal Performance level 1 products

Well plates and mats

Performance level 1 for everyday analysis

A full selection of high quality sample well plates for your UHPLC, LC and GC applications

We offer a comprehensive range of Thermo Scientific™ 96- and 384- well plates for complex and routine analyses in high-throughput screening laboratories.

We offer a broad selection of polypropylene (PP) well plates that meet ANSI and SBS standards with different sealing options and fit most manifolds, autosamplers, and robots.

Handle more samples in less time

- Low volume and high recovery cavity

Solutions for all applications

- Chromatography tested for solvent compatibility and inertness

Ultimate sample security

- Low-leachable, high-purity materials and manufacturing processes

Well plates and mats (continued)

Performance level 1 for everyday analysis

WebSeal well plates

Plastic, non-coated, non-sterile, chromatography tested

Description

- Thermo Scientific WebSeal well plates are manufactured from a GC/MS tested PP material
- Microplates are chemically and thermally resistant and will tolerate temperatures from -80°C to $+121^{\circ}\text{C}$
- SBS and ANSI standard footprint design for broad instrument compatibility
- Microplates are ideal for pharmaceutical applications, sample collection and storage, combinatorial chemistry and HTS applications
- U- and V- bottom wells for optimal sample recovery

Well plates and mats (continued)

Performance level 1 for everyday analysis

WebSeal mats and sealing tapes, non-sterile

For plates with round and square wells of 8 mm or 384 well plates

Description

- Mats manufactured of EVA (Ethylene-vinyl acetate) or pure silicone with or without PTFE coating
- The footprint permits plates to be securely stacked without robotic arm interference
- Eliminates cross contamination of samples
- Dry heat autoclavable (only silicone mats) with excellent chemical compatibility, withstand low temperature to -80 °C
- Resists coring and tearing
- Superior resealability after multiple injections
- Available pre-slit for easy penetration and reduced vacuum formation
- Sealing tapes minimize evaporation and protect samples from contamination and spilling.
- Adhesive seals effectively seal all microplate formats
- Wide range of adhesive seals for every assay
- Thin, lightweight tapes seal onto the plate with a convenient, handheld applicator (available separately, cat. no. 60180-M950)

WebSeal Performance level 2 products

Well plates and mats

Performance level 2 for high-throughput applications

WebSeal well plates

Plastic, non-coated, non-sterile, certified

Description

- PP microplates are manufactured from ultra low bleed high purity basis resin
- Plates are tested by GC-MS and LC-MS for organic extractables
- Microplates are chemically and thermally resistant and will tolerate temperatures from -80 °C to +121 °C
- SBS and ANSI standard footprint design for broad instrument compatibility
- Microplates are ideal for pharmaceutical applications, sample collection and storage, combinatorial chemistry and HTS applications
- U- and V- bottom wells for optimal sample recovery, total V-plates for low volume applications

WebSeal Plate+ plates

Glass coated microplates

Description

- High quality PP microplates coated with 200 nm thick layer of silicon dioxide
- Plate+ provides microplates with a chemical resistance similar to glass while retaining the advantages of PP
- Cost-effective alternative to inserted glass vials
- Excellent for applications where plastic microplates are not applicable
- Plate+ is chemically and thermally resistant and will tolerate temperatures from -80° C to +80° C
- Lightweight, precision molded, cost-effective alternative to solid glass plates

Well plates and mats (continued)

Performance level 3 for high performance analysis

WebSeal glass inserted plate kits

With 96-position mats

Description

- Convenient wellplate kits with pre-assembled glass vials
- Replacement parts for kits available separately
- Unique cutting tool allows removal of individual samples with the seal in place, eliminating cross contamination
- Mats with solid plugs are used for sample storage

WebSeal clear glass inserted plate kits

With individual closures

Description

- 96 position block systems with glass inserts are used when the pure PP block is not inert enough
- Inserts manufactured from clear, Type 1 Class A Glass
- Inserts are sealed individually with a PE Cap Seal and can be easily removed and used externally without risk of losing sample
- The products can be obtained as individual components or as completely assembled, ready-to-use convenience blocks

Barcoded well plates

For Thermo Scientific™ Vanquish™ HPLC and UHPLC systems

Description

- These well plates provide advanced sample security and sample integrity.
- This secure choice offers a tested portfolio for chromatography applications
- Barcoded well plates have an assured plate fit and a pre-applied orientation barcode in the correct reader position; therefore there is no risk of placing the plate incorrectly
- The secured side orientation in the autosampler alleviates the risk of starting the sequence in the wrong plate orientation
- The instrument controls plate orientation and verifies the plate before implementing the sequence

Description	Total height	Well format	Total volume μL/well	Working volume range μL/well	Pack size	Cat. no.
